

Maze link:

<https://t.maze.co/469523311>

The screenshot shows the Maze platform interface. At the top, there's a navigation bar with 'Build' > 'Share' > 'Results' > 'Report'. Below the navigation is a section titled 'Share your maze with testers' with a note 'Clips not enabled'. There are four options: 'Copy maze link' (invite testers via own channels), 'Hire panel participants' (get insights from a verified global pool), 'In-Product Prompt' (embed as a popover on your live website, currently unavailable on trial), and 'Send Reach Campaign' (email to a segment of your own testers). Below this is a 'Performance' section with a table:

NAME	SENT	STARTED	COMPLETED
